

Executive Overview

TITLE: Evaluating VANET Simulators for CARLINK Primary Applications

SUMMARY: This document provides a list of recent approaches in VANET simulation and it also discusses which is the best choice for covering CARLINK requirements among all alternatives.

GOALS:

1. Specify CARLINK needs concerning VANET simulation.
 2. Classify current trends in VANET simulation.
 3. Describe the most relevant features to CARLINK of the several tools in VANET simulation.
 4. Conclude with the best alternatives for fulfilling the CARLINK goals.
